☞ INSTRUCTIONS TO BIDDERS.

Coins and medals are sold at so much per piece, U. S. proof sets excepted. You cannot bid for one piece in a lot. If a lot contains ten pieces, and you desire to offer $2 for it, make your bid 20c. The auctioneer will accept an advance of 1 cent up to 50c., then 5c. up to $2.50, when 10c. is the limit, up to $10, and thereafter not less than 25c. Hence any bid up to 50c. can be entertained, but after that the bid must be 55c., 60c., and so on. Such offers as 53c., $1.01, and all intermediate figures are unavailable.

INTRODUCTORY NOTE.

THE Copper Coins grouped and briefly described in the following pages, comprise the most extensive and important collection which in my long experience, I have ever before catalogued for public sale. The work of arranging has been productive of more than usual interest, from the fact of my having shared with the owner the pleasure of gathering together much of the cabinet, the foundation of which was laid about eighteen years ago.

It would be needless repetition to note particular pieces, or comment in detail upon any of the many noteworthy series. It is enough to say that no such cabinet of ENGLISH TOKENS as described by Conder, has ever before been dispersed, if indeed any such has ever been gathered in this country. These little pieces have much historical and archæological value, from the views they bear, and heralds and genealogists also prize them highly. There will be found, also, many of the earlier Tokens described by Boyne, in which some very curious pieces are included. Several of the most remarkable of the later Tokens have been selected for illustration. The plates will be found at the close of the Catalogue, and while they give as fair a representation as could be expected from phototypes from the same negative, of pieces varying in color, thickness, etc., there is no possi-

bility of flattery, and an imperfect light or faulty development may do injustice, as is particularly the case in the figure of No. 223 (Cent of 1799), Plate I.

With those just mentioned will be found a large number of pieces from Scandinavia, the Low Countries, France, Spain, and Portugal, and a very large and attractive line of *Russian Coins and Patterns*, and at the close, many rare Siege and Necessity pieces in Silver and Copper. The Catalogue tells the story, and those interested and familiar with the science, will recognize the extent, rarity and high state of preservation recorded in its pages.

It has been found expedient to divide the sale, in consequence of which Part II will be offered early in the autumn, and will contain some equally important series of the remainder of the modern coinages of the world.

In addition to calling attention to my invariable rule of rigidly excluding counterfeits and all impositions from my sales, I think it opportune to state here that collectors will find the conditions of the coins, etc., to correspond exactly with catalogue representation — attention being invariably called to restrikes and pieces which are holed, scoured, or cleaned, or have loops removed — in accordance with a practice I have always observed, as all purchasers at my sales can readily testify.

I am not aware that the history of these two pieces has ever been made public, but with the many promiscuous tokens found in Canada up to the introduction of the Cent in 1858, these may have found companionship. Napoleon's memory, among the French Canadians, has ever been treasured; what stronger attest could there be than the large number of given names, in his honor, found among them?

This set, long in obscurity, first publicly made its appearance at a London sale in July, 1890, where it was noted most unostentatiously, with many tokens of the 18th century in the same lot. Its origin and striking, unquestionably, must be credited to the same period as the preceding. I have yet to learn of another set or a single specimen belonging to it, and I have come to regard it as unique, therefore of the highest rarity, besides being endowed with historic interest. See my letter regarding this set, written Oct. 19th, 1893, published in Mr. Breton's "Illustrated History of Coins and Tokens relating to Canada."

The following series, known as "Birmingham Bad Halfpence" by our English friends, and "Bungtowns" to us, were made in imitation of the Halfpence of Geo. II and III. The American Colonies, and later these United States, proved a profitable

market for minters of these impostors of small change. Mr. Crosby cites the act of the Legislature of Pennsylvania, legalizing the circulation of these pieces. They are in coin holders and numbered by my list, which appeared in the Scott Stamp and Coin Company's 16th edition of Copper Catalogue, 1890. The collection is unquestionably the largest ever drawn together in this country. The condition averages good, and it is doubtful if more than a few of them could be improved.

The series of **ENGLISH TOKENS** described by *JAMES CONDER* in 1798, including issues of the 20 years preceding. The collection here submitted approaches nearer to completeness than any before offered for sale in this country, and I feel it is safe to add, that no one here ever drew so many together. The nucleus of the collection was made up from the Mickley, Nichols, and Doughty cabinets; another and important source, was aid rendered by English dealers, who were supplied with lists of numbers wanted. The eccentric spelling on the pieces has been followed, usually without comment.

The Conder references are indicated by figures; the bracketed figure [1] *refers to page, the others to the particular number on the page.*
